

Heberlein Ceramics

Ceramic Processing Technology

Toll-manufacturing in the area of high performance ceramics.

Our technically competent and quality conscious staff have many years experience of processing high performance ceramics. Our strengths lie in the cost-effective complete processing of ceramic materials from prototypes up to medium size series. In order to remain successful in the future, we also give a high priority to the maintenance of high quality standards.

Our core competencies are:

Green machining

Sintering

Machining capabilities:

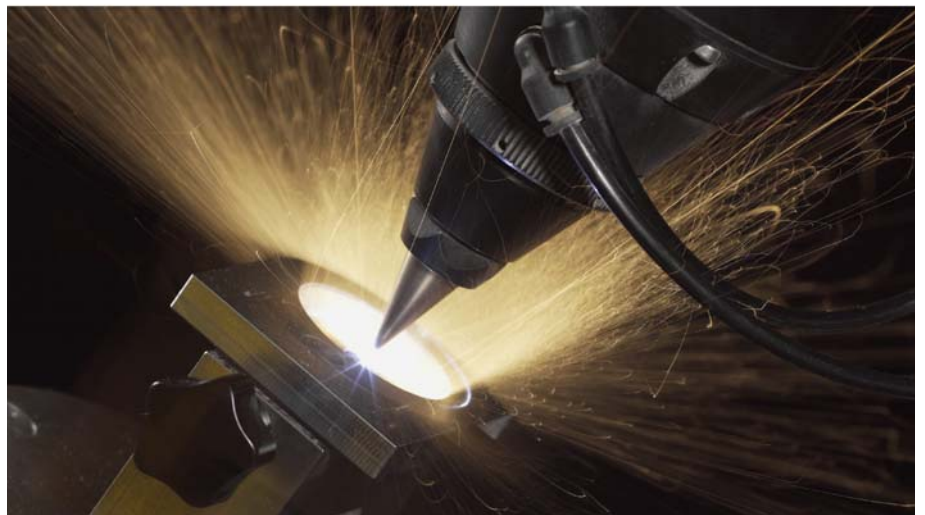

- grinding
- laser cutting
- lapping
- honing
- fine honing

Laser marking

Sub-assembly work

Materials:

- Aluminium oxide
- Zirkonium oxide
- others by request

Application of high performance ceramics:

- Wear resistant parts
- High temperature applications
- Corrosion resistant parts
- Medical technology
- Insulators
- Jet manufacturing
- Guidance parts
- Cutting tools
- Watch and Jewellery
